

# INDUSTRIAL ELECTRONICS REPAIR

We support the Energy industry's new, ageing & obsolete electronics systems and assemblies

## WHAT WE DO

We provide a comprehensive service focused on getting you back up and running quickly and reliably, regardless of your system.

### **AGEING/OBSOLETE EQUIPMENT SPECIALISTS**

We specialise in supporting aging and obsolete systems.

We have extensive experience in the energy industry and understand your specific needs.

Whether you are looking for verification and certification, diagnosis and repair or re-engineering and manufacture of equivalent assemblies, we have the knowledge, skills and experience to meet your needs.

### **RAPID SERVICE**

We understand the need to minimise downtime and return your systems to service as quickly as possible.

Our local facilities and comprehensive stock of components allow us to provide unrivalled turnaround in an emergency.

In addition, we are often able to provide a service exchange option as an alternative to repair.

### **QUALITY**

All services are provided by our experienced and multi-skilled engineers at our local facility-supported by an extensive library of legacy information.

All work is carried out in accordance with robust processes & procedures and all repairs are 100% function tested and verified.

### **COMPLIMENTARY SERVICES**

Spares Identification, Sourcing, Management & Storage, Re-engineered Solutions, Healthcare Checks, Offshore Installation, Commissioning & Modification, Engineered Procurement, Protection Systems Support, Controls & Instrumentation Support, Condition & Performance Monitoring, Maintenance & Reliability
